FILE HEADING.

Water supply to Robertsonpet

From The President of the Sanitary Board, Kolar Gold Fields

No. 4856-7/230 Dated 28.12.06 Received 3-1-07

Diary No. 5887 | Enclos. | Spare Copies. | Serial No. 1

BRIEF ABSTRACT OF LETTER.

Referring to G.O. no. 7489-90 (B 175-05) dt 1-1-06 represents that the Bethamangala tank has retained good supply of water and requests sanction for the laying out of pipes, to supply good & wholesome water to Robertsonpet.

NOTES AND ORDERS.

2. The question of supply of good drinking water to Robertsonpet by connecting it with the Bethamangala water supply system has been dealt with in detail

NOTES—First sheet.

MGCPB—30,000—17 2-05.

Serial No.

LB 175-05.
104-06.

× January 1906
Govt order no
7489-90
(LB 175-05)-4.
18-1-06

the marginally noted files. Owing to insufficiency of water in the Bellemmangala tank at the time Government directed that this question would be considered in July 06. Again the Asst Engineer who was consulted unofficially stated that owing to want of full supply in the tank, supply to Robertsonpet could not be guaranteed & that there is no provision for the work in the P.W budget; Government directed that in the absence of funds the work has to lie over.

G.Proc 2319-20
(LB 104-06)-1
dated 11th September 1906

3. Now the President represents that the tank has received its full supply & urges the necessity for supplying Robertsonpet, a centre of Industrial & Commercial activity, with good drinking Water. He also stated that the gravity of the situation was pointedly brought forward by the Mining Board to the notice when he visited the fields. of the Dewan, & solicits early sanction to the scheme

NOTE—Contn. sheet

GPB—50,000—23 10-05

Serial No.

4. A sum of Rs 14,370/— was estimated for the work & sanction was solicited to a loan of this amount, repayable in 8 or 9 years. This amount if ordered to be repaid in 8 years, the annual instalment will be Rs 2376/— & if in 9 years it will be Rs 2176/-. The Board expect an additional income of Rs 2000/- which, it is stated, could be spared for the expense of water supply thereto & to the Coolies Colonies which pay to Govt a ground rent.

5. The loan of Rs 20,000/— sanctioned for the Sanitary Board in 1899 will be completely repaid by 1911-1912. The Board have agreed to repay the present loan with interest at 4 p.c. per annum if necessary.

6. The late first Commissioner was in favour of sanctioning the loan & the Chief Engineer is in favour of giving the town its water supply if the tank should fill this year.

(X)

Note—Contn. sheet

Serial No.

7. The present financial condition of the Sanitary Board of the Kolar Gold Fields is noted below:—

Opening balance on the 1st July 1906 as per Comptroller's preliminary account	Rs 41,470. ✓
Estimated receipts for 1906-7	74,440
	115,910
Do Expenditure	70,997
estimated closing balance Rs	44,913

8 There are funds sufficient for meeting this charge & the necessity for obtaining a loan on payment of interest is not apparent.

9. Submitted for orders as to whether the Chief Engineer may be consulted again in matter 10 Put up a draft docket to the President asking him to report with the resolution of the Sanitary Board as to whether they moved in the cost which was once estimated at Rs 14,370/. from the Estimated Closing

Separately being

NOTE—Contn sheet.

Serial No. 5

26) From the President of the Sanitary Board. copy of letter 365 d 30.12.07 received with Deputy Comrs Do d 14/3/08 (D 6844). States that the Board are willing to meet the cost of the water supply to Robertson-pet from the closing balance in favr of the Board & are of opinion that the cost of water supply to Cooly Colonies should be met by raising a loan from Government and requests that the laying of pipes to Robertsonpet & the Cooly Colonies maybe put in hand as early as practicable, as the supply of good drinking water would probably prevent another outbreak of cholera which did much havoc on the last occasion

27) In this case two questions have to be decided

(1) Water supply to Robertsonpet

(2) " to the Cooly Colonies.

Both are stated to be very urgent and essential, especially

GPB—50 000—17-3-07

Serial No.

to possibly prevent the outbreak of cholera which did much havoc on the last occasion & which has now made its appearance on the fields & the adjacent villages.

Vide Copy of letter read by the President para 5

28) The first item is estimated to cost Rs 14,370 which the Sanitary Board are willing to meet from their closing balance.

29) The financial condition of the Sanitary Board is noted below:—

Opening balance on 1st July 1907 —	Rs 67503	
Estimated receipts	75600	
	143103	
Estimated expenditure	75600	
	67,503	
Deduct additional grant of Rs 13,033 recently sanctioned for lighting the main road with electricity	13033	
Est closing balance.	54470	

As already noted in L/S file No 328–06 lighting the main road with electricity under issue

30) The estimated closing balance admits of this charge (14370) being

Note—Contn sheet.

Serial No.

incurred.

31) It is not exactly known what the estimated cost of water supply to the Cooly Colonies would be. But the Board have resolved that Government be requested to advance Rs 15000 to be repaid in 5 yearly instalments of Rs 3000/- each. They have left out of consideration the amount of interest that is to be paid. As the ~~Condition of the~~ Sanitary Board could very well afford to meet this expenditure also ~~prosperous~~ there does not appear to be any necessity for a loan on payment of interest which ~~may~~ be an unnecessary charge. As however further Consultation of the Sanitary Board involves delay ~~and therefore~~ the scheme may perhaps be sanctioned after ascertaining from the Police Engineer what the probable cost of water supply to the colonies would be, the whole amount which may not go over Rs 30000/- being treated as an additional grant

(Vide Copy of resolution attached to the paper under reference.)

NOTE—Contn sheet.

GPB—50 000—17-3.07

Submitted to His Highness.

The scheme for water-supply to Robertsonpet is estimated to cost Rs.14,370; while the scheme for water-supply to the cooly lines for which an estimate is under preparation is likely to cost about Rs.14500. The Kolar Gold Fields Sanitary Board has agreed to meet the cost of the former scheme out of the balance at its credit, while for the latter scheme the Board has applied for a loan of Rs.15,000 repayable in 5 years. As however the closing balance at the credit of the Board admits of this work also being carried out without the aid of a loan from Government it is proposed to sanction an additional grant of Rs.30,000 in the Budget estimates of the Board for 1907-08 to meet the cost of the above two works.

This may be sanctioned.

29/4/1907

Deputy Commissioner & President, Sanitary Board, Kolar Gold Fields,

Dated Camp Champion Reefs, 28th December 1906.

L.B 104-06
Sl-2

From

C. Srikantesvara Aiyar Esqr., B.A. B.L.,
President, Sanitary Board, Kolar Gold Fields.

To

K. S. Chandrasekhara Aiyar Esqr., B.A. B.L.,
Secretary to the Govt. of H. H. the Maharaja
of Mysore, General & Revenue Departments.

Sir,

Adverting to Govt. Pro. No.7489-90/L.B.(175-05)-4 dated the 1st January 1906, observing that the subject of advancing a loan amounting to Rs.14,870 to the Sanitary Board, Kolar Gold Fields, for introducing the Betamangala Water to the town of Robertsonpet, can only be considered in July 1906, according to the Chief Engineer's forecast of water supply to the Betamangala tank, I have the honor to report that the Reservoir which was almost empty in the month of July 1906, received plenty of water in the heavy rains of August and September 1906 and has since been surplassing its weirs. When in the month of October 1906, the safety of the upper Muduvadi tank and Perjenahalli tank in the same, had been threatened by the heavy rains, the water in the Reservoir had to be let out to a certain depth through the flood gates in view to avert any sudden and unexpected disaster similar to that of November 1903, when the tank was wrecked by floods overtopping the bund. Since the cessation of the heavy rains, the flood gates have been closed with the result that the tank has soon filled and there is no more dearth of water.

2. The difficulty of procuring a pure and wholesome supply of drinking water at Robertsonpet, which has sprung up to a marvellous little Town in comparatively a short period, and

other localities on the Gold Fields, has been long and keenly felt by all alike- the local residents population, those engaged in industrial and commercial enterprises and by those connected with the several Government and private institutions. Hitherto the supply from the Reservoir was limited to the Mining Companies and withheld from the said localities, as the tank after its restoration had not filled owing to the drought that followed the restoration. Now that the Reservoir as well as the Holali tank above it which is also conserved for the same purpose of supplying water to the entire Gold Fields, are now quite full and there is no longer any fear of scanty supply therefrom, it is high time that the laying in of pipes for the supply to all the localities referred to above, were undertaken as early as practicable.

3. The Kolar Gold Fields including the rising town of Robertsonpet is no doubt a centre of industrial and commercial activity, but taking the class of floating population into consideration, it is not possible to levy anything more than a small water rate of, say, 4 % per annum on the rental value of the buildings at Robertsonpet, which would just come to about Rs.2000/- which can be spared for the expenses of the water supply thereto and to the several cooly colonies which pay to Government a ground rent.

4. There have of late been several cases of cholera in these cooly colonies threatening to discount the contemplated benefits of the Betamangala Water Supply that has been got up at such enormous cost. There are also numbers of applications from the owners of big charitable and other private Institutions for pure water supply, besides the pressing demand of the Police and various other Government institutions - dispersed in several directions - whose difficulty for securing an adequate supply of wholesome water can rather be imagined than expressed.

5. The gravity of the situation was pointedly brought forward by the Mining Board to the notice of the Dewan, when he last visited the Fields, and it was urged that unless the whole of the cooly colonies were supplied with Betamangala water it would be

impossible to avert the serious visitations of epidemics.

6. Under these circumstances, I solicit the favour of your obtaining the early orders of Government to push on with the laying in of pipes as early as possible before the next hot weather sets in.

I have the honor to be,

Sir,

Your most obedient servant,

L. Macaulay

W. Mc Hutchin Esquire, M.I.C.E.,

Chief Engineer of Mysore.

To,

K.S.Chandrasekara Iyer Esquire, B.A.,B.L.,

Secretary to the Government

of H.H. the Maharajah of Mysore,

General and Revenue Departments.

Sir,

Adverting to correspondence ending with Government Pro-ceedings No. 2319-20/L.B. (104-06)-1 dated the 14th September 1906 and with reference to Kolar District, Deputy Commissioner's letter No. 4856/230 of the 28th December last to your address urging the necessity for the early execution of the project for the water supply to the town of Robertsonpet, I have the honor to inform you that in my opinion it is very desirable, for the sake of the health of the large population on the Kolar Gold Field, that the town of Robertsonpet and all the cooly colonies and villages adjacent to the Field should be supplied with pure drinking water at an early date.

2. A project amounting to Rs. 14,370 prepared some time ago by the Executive Engineer, Water Supply and Stores Division, is herewith forwarded for sanction of Government. The cost of same may either be met by a loan to the Sanitary Board for the purpose; or if it is the intention of Government that it should be provided from Government funds, the requisite provision will be made in the next year's P. W. Budget.

3. The Executive Engineer, Water Supply and Stores Divis has been instructed to prepare projects for the water supply to the remaining cooly colonies and villages on the Field,

as

as soon as this is received it will be sent up to Government for sanction to be treated as a supplemental estimate to the one now forwarded for sanction.

I have the honor to be,

Sir,

Your most obedient servant,

W. D. W. Shuldham

Chief Engineer of Mysore.

From

C. Srikanteswara Aiyar Esqr. Ba. Bl.
President, Sanitary Board,
Kolar Gold Fields.

To

C. S. Balasundaram Iyer Esqr. Ba.
Offg. Secretary to the Government
of H.H. The Maharaja of Mysore,
General & Revenue Depts.

Sir,

I have the honor to state that the subject of providing funds for the water supply to the town of Robertsonpet and to Cooly Colonies was discussed by the Board at their meeting on the 29th November 1907, and the members were of opinion that the cost of supplying water to Robertsonpet could be met from the available balance at the credit of the Board, and that for the Coolly Colonies may be met by raising a loan from Government to

be repaid in five annual instalments.

Under these circumstances I have the honor to request that the laying of pipes to Robertsonpet and Coolie Colonies may be put in hand and completed as early as possible - This is urgently required as it will probably prevent another outbreak of Cholera which did so much havoc on last occasion.

Copy of Resolution is herein enclosed for information -

No 555. Dated 7th March 1908.

From

The President,
Sanitary Board,
Kolar Gold Fields

To

The Deputy Commissioner
Kolar District.

Sir,

I have the honor to inform you that there have recently been 4 or 5 cases of Cholera on the Fields - The disease is prevailing in Thagalur, Nangli & other villages of the bordering Taluk of Mulbagal and it is feared that it may spread -

2 Necessary precautions

have been taken and the drawing wells disinfected.

3. Under these circumstances I request that the Government in the Revenue Department may be ~~pleased~~ moved to sanction the water supply Scheme of Robertsonpet and Coolie Colonies at an early date so as to prevent if possible what occured here last year – The Sanitary Board have agreed to meet the cost of supply to Robertsonpet town from their closing balance & that of the Coolie Colonies from a Government loan.

4. Copy of letter addressed to Govt. on the subject is herein enclosed for information.

I have &c
Sd/ P. F. Bowring
for President

in Mysore on the same
subject.

(3) Letter no. 358 dated
the 30th December 1907
from the President of
the Sanitary Board stating
that the question of water
supply to Robertsonpet &
the Cooly Colonies was
discussed by the Board
on the 29th November
1907, & that the members
were of opinion that a
sum of Rs 14 370, being
the estimated cost of
water supply to Robertsonpet
Could be met from the
available balance at
the credit of the Board &
that the amount required
for supplying water to
the Cooly Colonies be met
by raising a loan from
Government repayable
in five years

Order thereon

No 11069-73
" L63104-06-
930.6.08

The projects for water supply to Robertsonpet and to the Coorg Colonies estimated to cost Rs 14370 and about Rs 14,370 respectively are sanctioned. The financial condition of the Board is very sound and the whole of the charge can be met from the estimated closing balance of the year, and there appears to be no necessity for raising a loan for this purpose. An additional grant of Rs ~~30,000~~ ~~28,870~~, is hereby sanctioned from the Sanitary Board funds for the current year for the projects referred to.

Mirza Ikramullah

special reasons why a portion of the cost of the scheme should be met by a loan and not from the available surplus, the Government will consider the question on receipt of a further communication on the subject.
